

**NOTES:**

1. THIS IS AN EXAMPLE OF A DUAL METERING RECONFIGURATION TO SEPARATE OUTDOOR FROM INDOOR USE WITH A CENTRALIZED AND SOLITARY SUPPLY FOR ALL OUTDOOR USES. IF THE SUPPLY FOR OUTDOOR USES ARE NOT CENTRALIZED AND/OR THERE ARE MULTIPLE HOUSE CONNECTIONS FOR OUTDOOR USE, THE EXTENT OF NEW PIPING TO TIE-OVER ALL OUTDOOR USES WILL LIKELY BE GREATER THAN WHAT IS SHOWN. RECONFIGURATION NECESSARY WILL VARY DEPENDING ON HOW OUTDOOR USES ARE SUPPLIED.

2. TO FACILITATE THE MAINTENANCE AND VISIBILITY OF DUAL METERS, LOCATING THE DUAL METER IN ANY LOCATION ON THE PRIVATE PROPERTY GREATER THAN 5 FEET FROM THE PRIMARY METER LOCATION WILL NOT BE PERMITTED.
